
Drop down menus go below another module

Posted by Joje - 2009/08/31 18:12

my yui menu works fine on IE 7 but in firefox the dropdowns Go behind the module below on the page.and they cant be seen or read what could be the issue?,

you can have a look here www.africaquestsafaris.com otherwise without that slideshow module its fine. <http://www.ari-soft.com/images/fbfiles/images/trouble.jpg>

Re:Drop down menus go below another module

Posted by admin - 2009/08/31 19:40

Hello,

Try to add the following CSS rules to your CSS file, it should help:

```
#div1
{
  position: relative;
  z-index: 2;
}
```

```
#div2
{
  position: relative;
  z-index: 1;
}
```

Re:Drop down menus go below another module

Posted by dbcooper - 2009/09/01 18:30

Hi! Thank you for your menu, I've been searching for one like this a long time ago. I have a problem similar to Joje's. My sublevel's go under the content on the page (i think). I can't provide you a link, because my page is running locally, but here is a picture. I tried to put the code you provided into my template.css (don't really know where to put it), but it didn't help. Thank's for help!

Re:Drop down menus go below another module

Posted by admin - 2009/09/02 06:52

Hello,

Add the following CSS rules to your CSS file:

```
.art-contentLayout .art-sidebar1
{
    position: relative;
    z-index: 2;
    overflow: visible !important;
}

.art-contentLayout .art-content
{
    position: relative;
    z-index: 1;
}
```

Hello,

This problem with flash object in . If you add the following parameter to tag, everything will work fine:

Regads,
ARI Soft

=====

Re:Drop down menus go below another module

Posted by final - 2010/05/04 09:14

thanks for this quick reply.

I don't know where to put this parameter you suggest.

Somewhere in the template.css ??? or in de index.php?

Thanks for the help!

Perry

=====

Re:Drop down menus go below another module

Posted by admin - 2010/05/04 09:34

This parameter should be specified for flash object from . Now HTML code for this flash object looks like:

use the following code:

It can be problem to add this parameter, if you don't have access to <http://www.wetransfer.com> source files because it requires additional coding.

Regards,
ARI Soft

Re:Drop down menus go below another module

Posted by final - 2010/05/04 11:00

Wetransfer is not my site ;-) Thanks anyway on apple safari it is OK now. Should be the same with chrome (same engine)

I'll keep trying to find a solution.

Perry

[Solved]Re:Drop down menus go below another module

Posted by tntsolid - 2010/05/07 23:54

Hello,

I tried all of the mentioned CSS solutions but no luck, my menu still goes under and disappears.(Specially on Firefox)
This is the URL:
<http://timeshareownerscommunity.com/exchange-rent/userslist.html>

I am using
Joomla 1.5.17
Community Builder 1.2
ARI YUI Menu 1.0.4

Thank you very much for your help.

Re:Drop down menus go below another module

Posted by final - 2010/05/08 06:54

At wich position did you publish your menu? if I type ?tp=1 behind your url and do a refresh it will show all your positions I see no on that spot try position top-b that looks better for the menu. If you make the font of the menu a bit larger it looks better. with the rest of the site.

Another thing is to start your div that is bothering you with clear: both to clear previous div's

Keep trying the solution will come! The ARI team is very helpfull.

Perry

Re:Drop down menus go below another module

Posted by tntsolid - 2010/05/08 15:56

It is published under content-top-a, I already tried under top-b but I got the same result. I hope somebody can help.
Thank's.

Re:Drop down menus go below another module

Posted by tntsolid - 2010/05/10 15:08

Thank you for your reply, the menu it's enabled again and you can see it on the original posted link.
Thank you for your time and help.

Re:Drop down menus go below another module

Posted by admin - 2010/05/10 18:16

Add the following CSS rule to your template CSS file:

```
.rt-container #rt-content-top
{
  overflow: visible;
  height: 170px;
}
```

Regards,
ARI Soft

Re:Drop down menus go below another module

Posted by tntsolid - 2010/05/10 19:29

Thank you for your help, it improved after I added the CSS but still shows problems:
On Firefox the top option of the ub-cat E.U. goes under and on IE 8 it shows now, but still under the text located below.

Re:Drop down menus go below another module

Posted by admin - 2010/05/10 20:45

Could you provide screenshot where we can see what you mean? You can send it by email.

Regards,
ARI Soft

Re:Drop down menus go below another module

Posted by tntsolid - 2010/05/11 15:47

Thank you very much ARI Soft for all your great support, the problem is fixed thanks to you by adding the following CSS code to my main template CSS:

```
BODY #rt-main-surround
{
  overflow: visible;
}
```

BODY .rt-container #rt-content-top

```
{
  position: relative;
  z-index: 2;
}
```

Re:Drop down menus go below another module

Re:Drop down menus go below another module

Posted by addyap - 2010/05/13 11:49

Hello,

I installed the menu system yesterday, very nice except I seem to have the same problem as the guys here.

Site is CFAR-m and you can see that if you mouse over the item Contact Us, the sub menu's are under the module being used for the CFAR-m presentation.

Is there a way I can rectify this for the whole site as I have the same problem on any page where another module is parallel to a sub-menu item.

Thank you in advance for your help,
Antony

=====

Re:Drop down menus go below another module

Posted by admin - 2010/05/13 11:56

Hello,

This problem with Flash object on your page. Use the following code for Flash object instead of current code:

In other words, add wmode="transparent" attribute to tag.

Regards,
ARI Soft

=====

Re:Drop down menus go below another module

Posted by addyap - 2010/05/13 12:00

Thank you for your reply, but I don't understand how to do what you suggest.

=====

Re:Drop down menus go below another module

Posted by admin - 2010/05/13 12:04

Change HTML code of Flash object on your page. Currently it doesn't support transparency due to 'ARI YUI Menu' is hidden under Flash object. If you can't do it by yourself, you can provide temporary access to your Joomla! backend by email and we'll help you.

Regards,
ARI Soft

Re:Drop down menus go below another module

Posted by addyap - 2010/05/13 12:09

Hello,

I have just emailed you with admin access information. Thank you in advance for your help.

Best wishes,
Antony

Re:Drop down menus go below another module

Posted by admin - 2010/05/13 12:20

Try now, please. It was a problem with 'SlideShare' plugin because it didn't add transparency attribute to Flash object. We have updated this plugin.

Regards,
ARI Soft

Re:Drop down menus go below another module

Posted by addyap - 2010/05/13 12:27

Thank you very much. Everything is working fine.

Fantastic, quick support!

Best wishes,
Antony

Re:Drop down menus go below another module

Posted by jmarian1 - 2010/06/01 20:53

Hi, although I mentioned that the drop down menu works after adding the wmode="transparent" in my flash video, I found out that on the first visit to the site, the video works perfectly but once you go to other pages of the site and go back to the frontpage where the video located, it doesn't show the video anymore but just the background color. I tried to use quicktime file also thinking that it may be a problem in flash but still the same. I also tried to change work around the css file but I didn't have any luck. Is there a way how to show the video after refresh or come back to the homepage? Please advice. My site is www.auw.org. Thanks.

Re:Drop down menus go below another module

Posted by admin - 2010/06/02 06:08

Hello,

It seems this issue appears only in IE browsers. Could you provide temporary access to your Joomla! backend by email that we can investigate this problem?

Regards,
ARI Soft

Re:Drop down menus go below another module

Posted by nstoker - 2010/06/08 12:34

Hi

More z-index issues for me. I have a Joomla site, where the mwnus go behind an image display plug in (called Bonckowall) (see my site at http://www.chelseadegreeshow.org/2010/index.php?option=com_content&view=article&id=5&Itemid=11) . I am not very familiar with z-index, but tried assigning the div containing the menu a lower one than that containing the image viewer.

Any help welcome - I really found the menus easy to install and use, and have done some css restyling.

Thanks
Neil <http://www.ari-soft.com/images/fbfiles/files/stoker.zip>

=====

Re:Drop down menus go below another module

Posted by admin - 2010/06/08 12:45

Hello,

It isn't issue with z-index, this problem with flash object on your page. It requires wmode="transparent" attribute that it'll be transparent. In other words, now HTML code for this flash looks like:

but it should be

Now, the service provider, 000webhost.com informed me, the website review finhished. I hope you may now help me.

[Http://woodyka2.net16.net](http://woodyka2.net16.net)

Gratefully thanks:

Woodyka
Hungary

Re:Drop down menus go below another module

Posted by admin - 2010/07/28 20:25

Add the following CSS rule:

```
body .art-contentLayout .art-sidebar1
{
  overflow: visible;
}
```

Regards,
ARI Soft

Re:Drop down menus go below another module

Posted by Woodyka - 2010/07/29 05:21

You're pro. Gratefully thanks! It works perfectly!

Woodyka

Re:Drop down menus go below another module

Posted by paul - 2010/07/29 12:25

Same problem. Tried a bunch of the solutions, but maybe I am not putting them in the right place. I've only added one

submenu so far, but I can tell it's dropping behind the content on every page.

Could you take a look at www.weekendwalk.com? I'm sorry, I pretty much know nothing about css, but can't afford to hire a designer yet1 :(

Also, I've tried repeatedly to figure out how to decrease the height of the menu (it's the mainmenu) so that the line is even at the end of it, but can't figure that out either.

Otherwise, I'm amazed at how easily I've gotten as far as I have with this dropdown biz, so thanks for the module.

PS
