
Multiple menus?

Posted by wwarwick - 2009/09/02 20:05

Hello and thank you for this tool.
Is there a way to have more than one ARI YUI Menu on a site?
Thanks you. B)

Hello,

Sure, you can see it on our demo server. You can create several 'ARI YUI Module' modules on your site with standard Joomla! possibilities. For this open 'Extensions->Module Manager' page on your Joomla! backend, check the module, click 'Copy' button and configure new module.

Regards,
ARI Soft
