Changing position of submenu dropdown Posted by anijack - 2012/01/17 16:37
Hi,
Does anybody know how to define the position of the dropdown submenu boxes. What I need to do is push the dropdown boxs down about 10px.
Thanks, Jack

Hello,
Provide a link to a page where we can see a menu and a screenshot where we can see what do you want to achieve.
Regards, ARI Soft

Add the next CSS rule to "CSS Styles" parameter in module settings:
#ariyui82 .yuimenu { padding-top: 12px !important;

}
Regards, ARI Soft
