
Submenu spacing

Posted by jokerlope - 2012/01/30 05:34

Hello, I've been working on this website and can't quite seem to figure out how to add some padding between the submenu text and the edges of the submenu, any advice or solutions you guys can think would be very welcome in helping me solve this problem. thanks

Hello,

Add the next CSS rule:

```
#ariyui46 UL UL LI
{
  padding-top: 6px !important;
}
```

Regards,
ARI Soft
