

Changing text color of drop down text menu (repost)

Posted by rowby - 2012/02/09 02:02

Hi

I'm reposting this message because somehow my original posting is going to an invalid url:

Please look at this page, at the bottom menu. The bottom menu has white text. I want the drop down items to have black text.

I created a special menu item (on this test site) so you can see the drop down. The drop down is labeled 'DROP DOWN ITEM'. And there are two sub items which are not showing. I assume it's because the color of the text is white???

Here's the link

<http://www.rowbytesting.com/>

Here's the css in the ARI YUI Menu module's css field:

```
body .rowby2columnfooter-text .yui-skin-sam .yuimenubar
{
background: transparent none !important;
}

body .rowby2columnfooter-text .yui-skin-sam .yuimenubar,
body .rowby2columnfooter-text .yui-skin-sam .yuimenubar A
{
border-style: none !important
}

body .rowby2columnfooter-text .yui-skin-sam UL LI
{
border-style: none !important;
}
```

Hello,

Use the next CSS rule:

```
.rowby2columnfooter-text #ariyui219.yui-skin-sam ul li a.yuimenuitemlabel
{
color: #000 !important;
}
```

Regards,
ARI Soft

Re:Changing text color of drop down text menu (repost)

Thanks you. That worked nicely.

Finally how can I change the padding between each item.

Right now it's

0 20px 0 10px

Instead I would like it to be:

0 20px 0 10px

Thanks!

=====

Padding before and padding after are the same in your post.

Regards,
ARI Soft

SOrry. I would like the padding to be:

0 11px 0 10px

Thanks!

```
#rowby2columnmain .rowby2columnfooter-text .yui-skin-sam ul li a
{
padding: 0 11px 0 10px !important;
}
```

```
#rowby2columnmain .rowby2columnfooter-text .yui-skin-sam ul li a.yuimenubaritemlabel-hassubmenu
{
padding: 0 20px 0 10px !important;
}
```

One final question on this particular menu.

I would like the submenus to stay open longer. I tried increasing the delay to 750 milliseconds but that did not help.

In an earlier post, several months ago, on a different url, you gave me this css to keep the submenu open longer.

Is there a similar css I can add to the css that will help me with this?

```
#phoca-wrap DIV#header-container
{
position: relative;
z-index: 10;
}

DIV#phoca-side1-bg
{
position: relative;
z-index: 1;
}
```

Below is the CSS I have so far:

```
body .rowby2columnfooter-text .yui-skin-sam .yuimenubar LI
{
background: transparent none !important;
}

body .rowby2columnfooter-text .yui-skin-sam .yuimenubar,
body .rowby2columnfooter-text .yui-skin-sam .yuimenubar A
{
border-style: none !important
}
body .rowby2columnfooter-text .yui-skin-sam UL LI
{
border-style: none !important;
}
body .rowby2columnfooter-text .yuimenubar A
{
cursor: pointer !important;
}

body .rowby2columnfooter-text A
{
font-family: arial !important;
color: #ffffff !important;
}
.rowby2columnfooter-text #ariyui216.yui-skin-sam ul li a.yuimenuitemlabel
{
color: #000 !important;
}

#rowby2columnmain .rowby2columnfooter-text .yui-skin-sam ul li a
{
padding: 0 11px 0 10px !important;
}

#rowby2columnmain .rowby2columnfooter-text .yui-skin-sam ul li a.yuimenubaritemlabel-hassubmenu
{
padding: 0 20px 0 10px !important;
}
```

Thanks!
