Hidden Sub menu

Posted by Stewdygert - 2012/03/01 06:54

_____

My menu is hiding mostly under the slideshow i have on my main page. I have tried going through the forums here and haven't found anything that works. If you can take a look and let me know what it is and how to fix it that would be fantastic.

My website is Almondunionchurch.org

Thank you in advance for your help.

Hello,

Add the next CSS rule:

```
BODY #mainmenu
{
 z-index: 9999;
 position: relative;
}
```
