modify mouseover / mouseout

Posted by jpberset - 2012/03/05 16:01
_____

Hello,
I would like to de activate the mouseout that hide a submenu when the user click on the menu. How can I achieve this?

Thank you,
JP

Hello,

It is necessary to modify the module.

Regards,
ARI Soft

Hello,

I'm fine with that, I'v already made a few mods. But can you give me a hint where I should do the modification for this? I can't sort it out.

Btw, In the file mod_ariyuimenu.php line 35, do I understand correctly if I say that the variable $activeTopId should be the id of item of the main level, and in that case the line should look like
$activeTopId = $activeMenuItem ? $menu->getTopParent($activeMenuItem->id) : 0;
instead of
$activeTopId = $activeMenuItem ? $activeMenuItem->id : 0;?

I'v got issues with the module because before that correction, %2s and $selectedIndex in the file class.YUIMenu.php was always -1 when clicking on a submenu (e.g line 126, in the menu instanciation the selected property did not work:
if (%2$d > -1) oMenu.getItem(%2$d).cfg.setProperty("selected", true)
)

Just one more point, if I put -1 as a delay time for the sumbemu to be hide (in the parameters), submenu does not get hidden when on mouseout the submenu. But the issue I have is for the main menu item mouseout, I dont' want that the submenu gets hidden.

"ARI YUI Menu" is based on YUI Menu widget. It is necessary to edit javascript code to described functionality.
