z index issue
Posted by topherf17 - 2012/03/26 14:30

_____

I am having issues with the dropdown menu falling behind a flash video that is below it. The issue occurs in IE and Chrome. I have tried putting a z index in several locations but can't seem to fix it.

http://indevsystems.com/

Thanks!

_____

Hello,

This problem with Flash object. Set "wmode" parameter to "transparent" value instead of "window" for Flash object.

Regards,
ARI Soft

_____

I should have known that :)

Thanks for the quick response! Love your products and would recommend them to anyone
