It does not work for all CSS settings

Posted by PSEsupra - 2012/05/31 14:01

_____

Hello Admin and All

I searched the forum font color settings, I found it.

But I would like the menu will be centered, and I want to change the background image.
There are two topical, but not a solution.
center problem: http://www.ari-soft.com/ARI-YUI-Menu/21092-center-the-menu.html
background problem: http://www.ari-soft.com/ARI-YUI-Menu/15393-Change-background-image.html
 :(

What can I do?

Thank you in advance.

_____

Hello,

Provide a link to a page where we can see a menu on your site.

Regards,
ARI Soft

_____

Unfortunately I can not give, because localhost is test mode

What code is to give his own background and the buttons are in the middle?

_____

Description of menu HTML layout and CSS classes can be found here. It should be useful if you want to change menu design or menu position.

Regards,
ARI Soft

_____

Unfortunately, I did not find one which is therefore responsible for the writing.

I show pictures.

_____

The module does not respond when I reset / write.
Separator simbol or color, centered place, background image, ... I do not understand. : (
