
Menu Widths

Posted by dgambill - 2012/07/03 17:47

We have our menu set up horizontal at the top of the page, and it has 5 items on it. I need to figure out how to decrease the width of the menu items so that I can add a sixth. Here is a link: <http://www.sapiencecorporation.com>

Thank you

Hello,

This problem with your custom CSS rules. Open /templates/bee5/css/position.css file and change "width" parameter for "#ariyui19.yui-skin-sam .yuimenubarnav .yuimenubaritem" CSS rule.

Regards,
ARI Soft
