
Just a text menu

Posted by techspecx - 2012/07/05 16:41

Hello,

Thank you for a fantastic extension. My question is could the menu just be plain text?

My website treelessmedia.com has the menu located on the bottom of the page.

I have added the below css to center the menu but would like to remove all other styling and have just a plain text menu with dividers between each word and adopt the templates link and hover colors.

```
.yui-skin-sam
{
  text-align: center;
  width: 100% !important;
}

.yuimenuubar
{
  display: inline-block !important;
  zoom: 1;
  *display: inline !important;
}

LI.yuimenuitem-item109
{
  border-right-style: none !important;
}
```

Thank you.

Regards,
Rob

Hello,

Add the next CSS rules:

```
body #ariyui89.yui-skin-sam .yuimenuubar
{
  background-image: none;
}

body #ariyui89.yui-skin-sam .yuimenuubar
{
  border-style: none;
}

#ariyui89.yui-skin-sam UL LI A.yuimenuubaritemlabel
{
  border-style: none !important;
}
```

Regards,
ARI Soft
