## I want a menu background Mine is transparent

Posted by strings41 - 2012/12/09 15:27

---

I installed this module and the drop part of the menu is transparent and unreadable. How can I put a background on it.

sotrucks dot com

Hello,

This problem with site template styles for default menu. Open index.php site template file and replace the following code:

with the following one:

That looks better. Now I have part of the page's text on top of the menu. The menu should cover the page up as it unfolds.

This problem with site template styles. Add the following CSS rules to "CSS Styles" parameter in module settings or to a site template CSS file:

```
#navr {position:relative;z-index:2;}
#main-content {position:relative;z-index:1;}
```
