I have installed ari\_yui\_menu in my site (see picture below). And I have 2 questions.

[http://www.ari-soft.com/images/fbfiles/images/30\\_01\\_2013\\_1\\_39\\_17\\_AM.png](http://www.ari-soft.com/images/fbfiles/images/30_01_2013_1_39_17_AM.png)

1. My menu is not place in the area I provided (see 1 in the picture). It fell out of the area a little.
2. I want to remove the blue background of menu (just plain text menu).

My site is here

How can I fix it, suggest me please.

thank you :)

Hello,

CSS file which is used by the module was modified so the menu is loaded in incorrect place. Restore original CSS file.
