How can i give diff colors for each menu item????
Posted by Fiyas - 2013/02/19 05:39

_____

Hi

I need to change the each menu item text colors to be different colors.Firstly i tried for hover color to be different for each menu item but i cant solve so kindly help me to change either the text colors of each menu item and each menu item hovers colors. Please help me i was staggering for a long time and im a newbie.

I have added image for reference and besidely check this url

_____

Hello,

Where we can see the menu?

Regards,
ARI Soft

_____

Add CSS rule in the following format:

```
.yuimenubar LI.yuimenuitem-itemITEM_ID
{
  background: none red !important;
}
```

Where ITEM_ID is ID of menu item. For example if you want to change color of "Movie Aspirant" menu item, add the following CSS rule:

```
.yuimenubar LI.yuimenuitem-item35
{
  background: none red !important;
}
```

_____

Use the following CSS rule:

.yuimenubar LI.yuimenuitem-item35>A
{
 color: blue !important;
}
