
Is YUI Menu mobile/iphone/ipad dropdown friendly?

Posted by hominid4 - 2013/03/16 17:32

Hello. I've been reading through the forums and see talk about Ext Menu drop down sub menus on mobile/iphone/ipad devices but haven't found info regarding the YUI Menu.

Does the YUI Menu with drop menus allow mobile devices such as the iPhone to choose the drop down menus? Or when clicking on the parent menu it doesn't give you a chance to click on one of the sub menus and will take you to the parent menu link?

Thank you!

Hello,

The module is not compatible with mobile devices.

Regards,
ARI Soft
