
CSS for my menu

Posted by frlobe - 2013/04/03 02:10

Hello,
I move my site from Joomla 1.5 to Joomla 2.5, template is Beez2.

I have some problem to solve the 2 following points (see image):

- how can I have my overall menu centered ? Actually, it is on the left of my template.
- all my menus are public. With Community Builder, the two menus, visible on my image) are only accessible if user are registered (if click, there is a message to say the user have to log in). Is there a way to have those menus in grey if not connected and orange if connected ?

Thank you in advance for your help.

Kind regards

=====

Hello,

1. Where we can see the menu?
2. The extension doesn't support the described ability.

Hello,
the site is actually only local on my computer. Any help possible ?
I could eventually post my overall site on Dorpbox as you could download it.

Thanks

We can investigate the problem if you provide a link to a page where we can see it.

OK, my site is not on line so no support. :(
Thanks
