
How can i move the horizontal menu ?

Posted by xpatval - 2013/04/03 15:07

Hello,

I've just installed the "ARI" menu, and configured it in position-1, horizontal.

As you can see here, the menu is set (but not by me) in top-right of the page.

I've tried with the css to move it in another place (top center, with a margin-top of 100px), but nothing's working...

Could you tell me how can i do that, please ?

Thanks,

xpatval

Hello,

This problem with site template styles for selected module position. Add the following CSS rules:

```
#header .yuimenu ul li a:link,
#header .yuimenu ul li a:visited
{
    display: block;
}
```

```
#header .yuimenu ul
{
    position: relative;
    right: 0;
}
```

```
#header .yui-skin-sam
{
    position: absolute;
    top: 40px;
    left: 10px;
}
```

Regards,
ARI Soft
