highlight color of parent when sub item selected
Posted by gsk99 - 2013/05/01 14:10

_____

I have a menu that is two levels. Currently when I select a top level or sub menu item it gets highlighted. What I would like is for the parent menu to be highlighted as well. For example:

Menu A
  item 1
  item 2
  item 3

If I select item2, it gets highlighted. I would also like to see "Menu A" highlighted when a item under it is selected.

Any ideas on how I might be able to accomplish this?

Thanks.

_____

Hello,

The module doesn't support this ability.

Regards,
ARI Soft
