Ari Menu
Posted by pwitter1 - 2013/05/04 21:35

_____

Website is:

http://chihuahuaclubofamerica.com/

The drop-down menu needs to be set a little lower so that it doesn't overlap the top menu (see attached file)

Can I also change the white to a light blue or something different.
Also, how do I change the menu colour from black to white, for instance?

Thanks http://www.ari-soft.com/images/fbfiles/images/Screen_Shot_2013_05_04_at_4.png

_____

Hello,

Add the following CSS rule:

#jsn-pos-mainmenu A.yuimenubaritemlabel
{
 line-height: 20px;
}

You can read here about menu HTML layout and styles. You can use it to customize the menu.

Regards,
ARI Soft
