Hello,

Sorry, but what is so hard? You can find download links on ARI YUI Menu and ARI Ext Menu pages. Use "Download ARI YUI Menu module for Joomla! 1.5" and "Download ARI Ext Menu module for Joomla! 1.5" links.

Regards,
ARI Soft

Oh, I don't know what was the problem. I tried that, and download link sent me to some phantom "download page". Anyway, everything is fine now, module is working like a charm! Very good job and thanks!
