
Understanding SKIN

Posted by f_d_amore@hotmail.com - 2010/05/19 10:31

Hi, I'm new user of your great Menu. I'm try to understand how style (skin) works. I read links that you suggest but still got problems. I'm try to change font size but I can't. I try to change safe_menu.css in this way: #ariyui57.yui-skin-sam .yuimenubarnav .yuimenubaritem { border-right: 1px solid #CCCCCC; font-size: 20px; } can you help me? tks

Hello,

You can change font size in module settings. Use 'Font size' parameter for this.

Regards,
ARI Soft
