
change background colour

Posted by avfivelstreek - 2010/05/23 13:37

I installed the ARI Yui Menu in our website www.avfivelstreek.nl
Now i want to change the backgroundcolour. I read in the review that i have to change this here:
modules>mod_ariyuimenu directory js>build>menu>assets>skins>sam directory
Where must i exactly change the colour in: #F5F5F5

Hello,

If you use the latest version of "ARI YUI Menu" (v. 1.0.5), you can place the following code in "CSS Styles" parameter:

```
BODY #{$id}.yui-skin-sam .yuimenu .bd {  
    background-color:#F5F5F5;  
}
```

Regards,
ARI Soft

Thank you. It has been changed.
I have a last question: i would like to remove the border.
Is that also possible ?

Yes, you can add the following CSS rule to 'CSS Styles' parameter:

```
BODY #{$id}.yui-skin-sam .yuimenu .bd  
{  
    border-width: 0;  
}
```

Or the following CSS rule to safe_menu.css file:

```
BODY {$id}.yui-skin-sam .yuimenu .bd  
{  
    border-width: 0;  
}
```

Regards,
ARI Soft

Thank you for your quick support.

Nice regards,

Jack Brondsema.
