
Submenu item hides when it goes off the module

Posted by gfrios - 2010/05/26 20:02

I installed the module and works fine except when I add a submenu item and it goes off the module, it shows it partially. I tried some of the CSS changes on other posts but haven't been successful. See image attached. Thank you

Hello,

Probably module container contains "overflow: hidden" CSS property. Provide link to page where we can see this issue that we can help you.

I tried in the one I have published and it doesn't work either. See link:

http://proemcor.hacemostuspaginas.com/index.php?option=com_content&view=article&id=1&Itemid=2

On the right you will see the menu.

Thank you! <http://www.ari-soft.com/images/fbfiles/images/ariyuimenu2.png>

Add the following CSS rule:

```
.art-Sheet-body .art-contentLayout .art-sidebar1
{
  overflow: visible;
}
```

```
.art-BlockContent-body .yuimenubar ul li
{
  background-image: none;
}
```

Dear great guys at ARIsoft,

Congrats on a great component! Well done.

My problem is similar to the one above and after successless trying out all the different suggestions in this forum relating to this issue I'm afraid to bother you with this maybe stupid question:

My submenus are visible though not clickable since they overflow into another component. Could you please advise.
link is www.koyaa.se

Thanks a bunch in advance.

cheers,

/jogika

Hello,

Sorry, but we can't open your page because it requires user name and password.

Regards,

ARI Soft

Hello,

Add the following CSS rule to your template CSS file:

```
BODY #Layer-2
```

```
{  
  z-index: 12;  
}
```

You guys are great. Didn't expect to get a reply on SUNDAY!! I've added the lines and the first level submenu works now fine! still I cannot access the 2nd level submenu. Hope you can point me in the right direction on this one as well.

Thanks for your fantastic work.

/jogika

You are welcome. Could you explain, do you have problem with the 2nd level menu or not?
