## Keeping the menu central

Posted by ronwireland - 2013/10/07 11:29

---

Hello

I would like to keep the menu central so if I add another menu item it would just centralise.  
Can you please tell me how to do it. Site [www.gdmarquees.co.uk](http://www.gdmarquees.co.uk)  
Thanks

Hello,

The following warning appears when we try to open the page:

I have just rebuilt the site as it was hacked and am waiting for Google to review it again. If you open it with IE it is fine.  
Sorry about that.

Add the following CSS rules:

```
.art-nav .yui-skin-sam
{
    text-align: center;
}
```

```
.art-nav .yuimenuubar
{
    display: inline-block !important;
}
```
