
CSS Styling questions

Posted by hinata93 - 2010/06/03 12:38

Hi,

Thanks again for the great support! I have a few questions on how to style the menu:

- 1) How to remove the default dropdown arrow image?
- 2) How to specify standard width for each parent item placeholder (currently, item width auto resizes) and center text in placeholder?
- 3) I've removed the border from the menu (BODY #{\$id}.yui-skin-sam .yuimenu .bd {border-width:0;}) but a vertical line between each parent item still remains. How can I remove this?

Screenshot of current layout below.

Appreciate your help!

Use the following CSS rules, please:

1.

```
.top_menu .yui-skin-sam .yuimenubarnav .yuimenubaritemlabel-hassubmenu
{
    background-image: none;
}
```

2.

```
.top_menu .yui-skin-sam .yuimenubarnav .yuimenubaritemlabel
{
    width:55px;
    text-align:center;
}
```

3.

```
.top_menu .yui-skin-sam .yuimenubarnav .yuimenubaritem
{
    border-right-width: 0;
}
```

```
top_menu .yui-skin-sam .yuimenubarnav .yuimenubaritemlabel:hover,
.top_menu .yui-skin-sam .yuimenubarnav .yuimenubaritemlabel-selected
```

```
{
border-left-width: 0;
margin-left: 0px;
}
```

Thanks for your response.

1- worked perfectly.

2- fixed width worked perfectly but center align doesn't work

3- still doesn't work. I tried changing border-left-width=0 and border-right-width=0 to border-width=0 in both cases, this gets rid of the vertical lines on hover but not while inactive.

Could there be a conflict in my CSS styling? Here are the current styles in my CSS styles parameter box:

```
.yui-skin-sam .yuimenu .bd
{
line-height: inherit;
}
```

```
.top_menu .yui-skin-sam .yuimenu .UL
{
padding: 0;
}
```

```
.top_menu .yui-skin-sam .yuimenu .UL .LI
{
padding: 0;
margin:0;
}
```

```
.top_menu .yui-skin-sam .yuimenu .yuimenu .UL .LI
{
float: none;
}
```

```
BODY #{$id}.yui-skin-sam .yuimenu,
BODY #{$id}.yui-skin-sam .yuimenuitem-selected,
BODY #{$id}.yui-skin-sam .UL .LI.yuimenuitem-selected,
BODY #{$id}.yui-skin-sam .yuimenu .bd
{
background-color: #fff;
background-image: none;
border-width:0;
}
```

```
BODY #{$id}.yui-skin-sam ul li a.yuimenuitemlabel,
BODY #{$id}.yui-skin-sam ul li a.yuimenuitemlabel:link,
BODY #{$id}.yui-skin-sam ul li a.yuimenuitemlabel:visited,
BODY #{$id}.yui-skin-sam ul li a.yuimenuitemlabel,
BODY #{$id}.yui-skin-sam ul li a.yuimenuitemlabel:link,
BODY #{$id}.yui-skin-sam ul li a.yuimenuitemlabel:visited
{
```

```
color: #5F798F;
}

BODY #{$id}.yui-skin-sam ul li a.yuimenuaritemlabel:hover,
BODY #{$id}.yui-skin-sam ul li a.yuimenuitemlabel:hover
{
color: #CC0000;
}

.top_menu .yui-skin-sam .yuimenuaritemlabel-hassubmenu
{
background-image: none;
}

.top_menu .yui-skin-sam .yuimenuaritemlabel
{
width:55px;
text-align:center;
}

.top_menu .yui-skin-sam .yuimenuaritem
{
border-width: 0;
}

.top_menu .yui-skin-sam .yuimenuaritemlabel:hover,
.top_menu .yui-skin-sam .yuimenuaritemlabel-selected
{
border-width: 0;
margin-left: 0px;
}
```

Thanks again!

2. Add the following CSS rule:

```
.top_menu .yui-skin-sam .yuimenuaritemlabel
{
padding: 0;
}
```

3. Unfortunately we don't see this issue on sources which you sent.

Regards,

ARI Soft

Thanks! 2. is fixed now.

Still can't seem to solve 3 - am running on Mac OS and the bars are visible in Safari, Firefox and Chrome... but can live with it for now.

Thanks for all your help!
