
how to change the colors and fonts

Posted by shaon935 - 2010/06/07 10:43

Hello

I am very novice in joomla development and i installed the menu in my project and i need to know something to improve it.

1. How to change the background color at on hover.
2. How to change the font color?
3. I saw there is a space of the menu's in up and down when mouse the is hovering. Can anyone please tell me how to remove it?
4. How to increase the width and also the height?

Shaon

Hello,

Regarding your questions:

1. Add the following CSS rule to 'CSS Styles' parameter in module settings:

```
body #{$id}.yui-skin-sam ul li a.yuimenuitemlabel:hover
{
    background: red;
}
```

2. Add the following CSS rule to 'CSS Styles' parameter in module settings:

```
body #{$id}.yui-skin-sam ul li a.yuimenuitemlabel
{
    color: green;
}
```

3 and 4. Provide link to page, please, where we can see menu on your site because template CSS styles can override some menu styles.

Regards,
ARI Soft

Thanks a lot for your quick reply.

I am using the menu in my left side bar and using the vertical menu.

ok..
I would like to make the menu's like
www.iub.edu.bd's top menu. Just except the dropdown I would like to make it vertical and also put it in the side bar of
that side.
Please give a quick reply.

Place the module into necessary position, configure it and add the following code to 'CSS Styles' parameter in module
settings:

```
body #{$id}.yui-skin-sam .yuimenu .topscrollbar,  
body #{$id}.yui-skin-sam .yuimenu .bottomscrollbar,  
body #{$id}.yui-skin-sam .yuimenu .bd  
{  
  background-color: #0E3776;  
}  
  
body #{$id}.yui-skin-sam .yuimenu LI.yuimenuitem-selected  
{  
  background-color: #496EB2;  
}  
  
body #{$id}.yui-skin-sam ul li a.yuimenuitemlabel  
{  
  color: #FFF;  
  font-weight: bold !important;  
}
```

Here the link

<http://centers.iub.edu.bd/chpdnew/>

I already added the module and would like to make the color, border and fonts as like top of the menus..

Please give me a quick reply..

Hello,

You can add the following code to 'CSS Styles' parameter in module settings:

```
#{ $id }.yui-skin-sam .yuimenu DIV.bd
```

```
{  
  background: #0E3776;  
}
```

```
#{ $id }.yui-skin-sam DIV.bd ul li a.yuimenuitemlabel
```

```
{  
  color: #FFF;  
}
```

```
#{ $id }.yui-skin-sam DIV.bd ul li a.yuimenuitemlabel-selected
```

```
{  
  background: #496EB2;  
}
```

```
#{ $id }.yui-skin-sam .yuimenu DIV.bd .yuimenu DIV.bd
```

```
{  
  background: #496EB2;  
}
```

```
#{ $id }.yui-skin-sam DIV.bd ul li DIV.bd ul li a.yuimenuitemlabel-selected
```

```
{  
  background: #1F3D59;  
}
```

Font size and weight you can set in module settings.

Regards,
ARI Soft

Use 'Font weight' parameter in module settings that define font weight. If you want to change color of the arrow, edit /modules/mod_ariyuimenu/mod_ariyuimenu/js/build/menu/assets/skins/sam/menuitem_submenuindicator.png image.
