Menu on right
Posted by BvW - 2014/03/11 19:29

_____

Hi, I want to use the menu on the right side (original it starts on left) If I use the following code:

.yuimenubarnav
{
text-align: right;
}

.yuimenubarnav .bd
{
display: inline-block;
}

It starts right but there is no line left from first button and the menu bar is higher than before.
Perhaps I can use the css direct. I use the safe mode and know where the css are placed.

Thanks in advance

_____

Hello,

Send a link to a page where we can see the menu.

Regards,
ARI Soft

_____

Hi, You will find the menu in www.bilderundmehr.eu
At moment I have switch back to the original but I can switch it "with" the changes.

_____

So, I have done the changes. You can see the menu on right with the small issues.

Thanks in advance for your help

_____

Use the following CSS rules:

.yuimenubarnav
{
text-align: right;
line-height: 0 !important;
}

.yuimenubarnav .bd
{
display: inline-block;
}

Regards,
ARI Soft
