## menu items not loading articles

Posted by Josephi - 2010/06/18 15:42

---

This most likely has been covered before, but my search didn't locate it. I created a menu, each item is supposed to load an article. When I click on one, I get the default front page sans CSS.

Ideas?

site at: <http://inmigracion.ws>

The "Health Care Professional" item is the one in question, as all those below it are "dummy" items temporarily.

Thanks!

Hello,

This isn't 'ARI YUI Menu' issue. This problem with Joomla! SEF. Check your mail for more details, please.

Regards,  
ARI Soft
