## Dropdown extend past header?

Posted by skyekr - 2010/06/25 13:52

---

Here is the link to my webpage <http://nationalhealthreview.biz>

My dropdown menu does not extend past the area for the header. I am a good hack, but not a good programmer. How do I get the menu to extend past the header area without increasing the size of the header area?

Thank you for your TERRIFIC support and great module!

This problem with template CSS styles, add the following CSS rule that fix this issue:

```
#pillmenu .yuimenuubar UL UL
{
  height: auto;
  overflow: visible;
}
```
