## Dropdown not working on certain tabs

Posted by Jerard - 2014/09/18 16:37

---

Hiya,

First of all I would like to thank the help I've received. I now have my menu just the way I want it but have a question regarding a certain "quirk" I've discovered.

Go to my site [HERE](#).

Select either the "Blog" tab or the "Gallery" tab.

Note that the dropdown menus (under "Life Insurance" and "More...") do not work when these certain pages are showing. Is this something that can be fixed with CSS for YUI? If not any ideas on what is causing it? It is doing it on both Firefox and IE.

Thank you,

=====

Hello,

A javascript error occurs on the page. The error is not related to "ARI YUI Menu" extension, but it prevents execution of "ARI YUI Menu" javascript code. Fix the error and the menu should work fine.

Regards,  
ARI Soft
