
Remove background + borders from top level

Posted by qpidity - 2010/07/03 14:30

Hi,

I really like this menu however I'm trying to achieve the following with the horizontal version but am having difficulty as I can't seem to control the CSS much at all:-

1. Top level menu items with no background and no borders at all;
2. Rollover background removed from top level menu items and add a font colour change instead on rollover;

Is there a document somewhere explaining how to change various aspects of the menu ?

Many thanks

Q.

Hello,

Provide link to page, please, where we can see the menu on your site that we can help you. Information about CSS styles of menu, you can find here.

Regards,
ARI Soft

Thanks for providing that link. I managed to remove borders, background images and make the background transparent, and also add a hover colour on the parent item links by pasting the following into the module parameters CSS:-

```
#ariyui98.yui-skin-sam .yuimenuubar {  
  font-size: 93%;  
  line-height: 2;  
  *line-height: 1.9;  
  border: none;  
  background: none transparent;  
}
```

```
#ariyui98.yui-skin-sam .yuimenubarnav .yuimenubaritem {  
  border-right: none;  
}
```

```
#ariyui98.yui-skin-sam UL LI A.yuimenubaritemlabel,  
#ariyui98.yui-skin-sam UL LI A.yuimenubaritemlabel:link,  
#ariyui98.yui-skin-sam UL LI A.yuimenubaritemlabel:visited,  
#ariyui98.yui-skin-sam UL LI A.yuimenubaritemlabel:hover {  
  border:none;  
}
```

```
#ariyui98.yui-skin-sam .yuimenubaritem-selected {  
  background: none transparent;  
}
```

```
#ariyui98.yui-skin-sam UL LI A.yuimenuaritemlabel,  
#ariyui98.yui-skin-sam UL LI A.yuimenuaritemlabel:link,  
#ariyui98.yui-skin-sam UL LI A.yuimenuaritemlabel:visited,  
#ariyui98.yui-skin-sam UL LI A.yuimenuaritemlabel:hover {  
color:#cc0000;  
}
```

```
#ariyui98.yui-skin-sam UL LI A.yuimenuaritemlabel,  
#ariyui98.yui-skin-sam UL LI A.yuimenuaritemlabel:link {  
color:#000;  
  
}
```

```
#ariyui98.yui-skin-sam UL LI A.yuimenuaritemlabel,  
#ariyui98.yui-skin-sam UL LI A.yuimenuaritemlabel:visited {  
color:#000;  
  
}
```

```
#ariyui98.yui-skin-sam UL LI A.yuimenuaritemlabel,  
#ariyui98.yui-skin-sam UL LI A.yuimenuaritemlabel:hover {  
color:#cc0000;  
  
}
```

However I can't seem to alter the font-size. I use the web developer firefox extension and have tried altering all references to font-size but without any success. Can you please advise how to amend ?

Many thanks

Just noticed the font-size parameter within the module!! Bit stoopid of me not to have noticed earlier. Problem solved now.
