
Fixed button width

Posted by kiril_nedev - 2010/07/05 16:21

hello first i`m sorry for that stupid question, i`ve read a lot but nothing helped me
the site is: <http://fokkerc.tk/bg/>

I have two instances of the menu but the problems are with the top one

1. I need all the buttons to be 140 pixels in width (every one of them).
2. Need to change the text color and rollover color

The top menu`s name is: top\_menu and it`s placed in the 'banner1' slot of the template.

Thank you a lot in advance.

Best Regards,
Kiril Nedev

Hello,

Try to add the following CSS rules:

```
body .yui-skin-sam .yuimenubarnav .yuimenubaritem
{
    width: 140px;
}
```

```
body .yui-skin-sam .yuimenubarnav .yuimenubaritemlabel-selected
{
    border-color: #808080;
}
```

```
body .yui-skin-sam .yuimenubarnav .yuimenubaritemlabel-selected
{
    border-left-color: #CCCCCC;
}
```

```
body .yui-skin-sam .yuimenubarnav .yuimenubaritem-selected
{
    background-image: none;
}
```

Regards,
ARI Soft
