
Can't see Edit menu items

Posted by woodstock - 2015/03/16 22:37

We upgraded to j2.5 and we created a menu to edit the article categories but nothing is appearing. All settings are the same but nothing shows. See snapshots. The one that shows the article categories is from the old site in j1.5 and the other one from the upgrade j2.5 is not displaying those listed items, only the module title shows. Same template also. Just can't figure this out?

Here is the comparison image. I was only able to send one image earlier.

Hello,

Is it possible to see the problem?

Regards,
ARI Soft

Yes, PM me for the credentials. Domain is thompsonct.org. You would need admin access login to edit from front end.

RESOLVED: Can't see Edit menu items

Posted by woodstock - 2015/04/07 03:29

Apparently the "Start level" parameter was set to 0 instead of 1.

Thank You for the support.
