Dropdown items not visible
Posted by qpidity - 2010/07/23 10:36

_____

Hi,

I have a jquery slideshow which is positioned just below my ARI YUI drop down menu. The dropdown items are only visible when the slideshow images fadeout. I've tried applying a z-index of 99 to the menu and a z-index of 98 to the slideshow however this has not worked. Can anyone please assist ?

Site in question is here

Thanks in advance

_____

Hello,

"z-index" property works when "position" property is set to "relative" or "absolute" value. Add the following CSS rule:

#wrap,
#navlinks,
#imgblock
{
   position: relative;
}

Regards,
ARI Soft
