## Menu Location

Posted by wecreatem - 2016/10/15 22:59

---

I am just adding this menu to a rebuilt site and I want the menu to be located above the content of the page and centered. Can you please provide the CSS code for me to do this.

The site is located at <http://pkdbrealestate.com/CVBMWRiders/>

Hello,

Add the following CSS rules to "CSS Styles" parameter in module settings:

```
.art-sheet {  
    margin-top: 30px !important;  
}  
.art-header .art-nostyle {  
    width: 100%;  
    top: -32px;  
}  
  
.art-header .yui-skin-sam {  
    text-align: center;  
}  
  
.art-header .yuimenuubar {  
    display: inline-block !important;  
}
```

Regards,  
ARI Soft
