
How to adapt my menu style to default template CSS

Posted by volkan.evrin - 2010/08/11 07:28

I tried to use ARI YUI Menu items on the top menu. It works!

But I want to adapt the menu styles to default template top menu where I put the ARI menus. The CSS part is below.

```
#mainlevel-nav {
font-size      : 14px;
list-style     : none;
padding        : 0;
margin         : 0;
margin-left    : 1px;
}

#mainlevel-nav li {
float          : right;
display       : block;
list-style     : none;
background-image : none;
padding-left   : 2px;
padding-right  : 2px;
margin        : 0;
width         : auto !important;
font-size     : 11px;
line-height   : 26px;
white-space    : nowrap;
border-left   : 1px solid #999999;
}

#mainlevel-nav li a {

padding-left    : 10px;
padding-right   : 10px;
font-size      : 11px;
color          : #333333;
text-decoration : none;
}

#mainlevel-nav li a:hover {
font-size      : 11px;
color          : #990000;
}

=====
```

Hello,

Information about the menu styles can be found in this post.

Regards,
ARI Soft
