_____

sorry the side is in work, can't show you online, saved mode...

there is a strange behaviour that i can't understand.
see the following picture http://www.ari-soft.com/images/fbfiles/images/one.jpg

at the bottom there are two lines, the code is:

ErlÐ´uterungen Palliativmedizin
Kursweiterbildung
Information zur Anmeldung fÑŒr das Fallseminar
Fallseminar Modul I
Termine Module I
Fallseminar Modul II
Fallseminar Modul III

there are two empty tags, where do they come from, does anybody know whats to do

Hello,

Provide link to page, please, where we can see this issue.

Regards,
ARI Soft

_____

sorry but i told that it is actual not possible.

the problem i think is, that i use the ari yui menu es splitmenu.
it should only show the third level from every 2.level

1. level -> QUALIFIZIEREN
2. level -> Zusatzbezeichnung Palliativmedizin
3. level -> ErlÐ´uterung Palliativmedizin
        Kursweiterbildung
        ...

there is also a 3. level in different other 2. levels, for example
2. level -> Pflege
3. level -> abc
        def
        ...

level 1 and 2 is a part of mainmenu, i insert ari yui menu starting and ending at level 3,

when i click now on 2.level -> Zusatzbezeichnung Palliativmedizin
i get everething opened that is on level 3
    3. level -> ErlÐ´uterung Palliativmedizin
            Kursweiterbildung

            ...
            abc
            def
            ...

that is not what i wanted!

to solve this problem i go allways one level deeper
2. level -> Pflege
3. level Seperator
4. level -> abc
        def
        ...

i can give now every 2.level navigation its own ari-yui-menu for its subnavigation, it works fine but i get this lines.

is there any other way to give every 2.level navigation its own subnavigation?

_____

It's hard to help because we don't see the problem.
