Menu not fully visible
Posted by pzb - 2010/08/31 14:06
_____

Hi,

After installing ARI YUI menu and done some reading on this forum i have a problem:

Some drop down menus are not fully visible. I've attached a file so that you can see the problem.(drop down menu is behind 'Cycling')

Can you help me out? http://www.ari-soft.com/images/fbfiles/images/menu1.jpg

Kind regards,

Peter

_____

Add the following CSS rules:

body .art-Block,
body .art-BlockContent,
body .art-Block-body,
body .art-BlockHeader
{
 z-index: auto;
}

Regards,
ARI Soft

_____

Provide temporary access to your Joomla! backend by email, please, that we can investigate this issue.

Regards,
ARI Soft

_____

This issue could be fixed if your site template could apply module suffix to module container but it can't do it so all module containers have the same z-index and IE display it incorrect.

I don't understand your answer.

Is it for my template possible to fix it?

Peter

_____

Yes it's working in IE now :)

Can you tell me what you've done so i can apply this the next time?

Kind regards,

Peter

_____

We have added module suffix in module settings and the next CSS rule:

```
body .art-sidebar1 .art-Blockwalking {
  z-index:200;
}
```
