
Menu Item using alias (or not) causes 404 error.

Posted by Dekari - 2010/09/09 05:51

Please help i've the latest version 1.0.16 and my links on the menu are broken (404 error). The same link in normal mod_mainmenu works fine!!

I've read the other posts about the issue but they say to upgrade. I already upgraded... What to do? The menu is excellent, i managed to customize all the css to fit in my template but the links aren't working!!!

Please help!

my site is www.erasitexniko-podosfairo.gr (the menu is on top with orange background, the second tab has 404 error (the others are not set until i fix the error))

The link created by Ari YUI menu:

http://www.erasitexniko-podosfairo.gr/index.php/2010-09-09-05-32-58/itable/1.html?gr_id=1

The link created by mod_mainmenu

<http://www.erasitexniko-podosfairo.gr/index.php/2010-09-09-05-32-35.html>

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,
ARI Soft

Posted by Dekari - 2010/09/09 08:05

Hello again

my site is

www.***.gr

You can enter with

username: ***

password: ***

see the topmenu (•À~½É œµ½¿Í) and the second menu tab . (• £ ' .½Î½)

thanks a lot!!

Re:Menu Item using alias (or not) causes 404 error.

Posted by metmusic - 2010/12/08 15:55

Hi,

I have similar problem but causes 500 error.

Item url is <http://vba.m-des.pl/component/content/1.html> instead <http://vba.m-des.pl/o-firmie/kim-jestesmy.html>

Classic Joomla menu is ok. URL is fine...

Please help me,

Regards

Sorry - not this module. My problem is with ARI Ext Menu

Re:Menu Item using alias (or not) causes 404 error.

Posted by metmusic - 2010/12/08 16:50

Ok thanks but I want to know how to fix it in future:) Could You write solution?

=====

Re:Menu Item using alias (or not) causes 404 error.

Posted by admin - 2010/12/08 16:52

We don't know solution because we can't reproduce this problem on our test server, we required credentials that we can investigate this problem.

Regards,
ARI Soft

Re:Menu Item using alias (or not) causes 404 error.

Posted by metmusic - 2010/12/08 16:55

Ok,
I created user for you - login and pass via e-mail (joomla system e-mail).

Thanks a lot,
Regards

Re:Menu Item using alias (or not) causes 404 error.

Posted by metmusic - 2010/12/08 17:09

I see - thanks! Now everything is fine.
What was wrong?

=====

Re:Menu Item using alias (or not) causes 404 error.

Posted by admin - 2010/12/08 17:11

It was a bug. We have updated /modules/mod_ariextmenu/mod_ariextmenu/menu.html.php file.

Regards,
ARI Soft

Re:Menu Item using alias (or not) causes 404 error.

Posted by metmusic - 2010/12/08 17:54

Now is other new problem.
Second level with childs is broken :/

It looks <http://vba.m-des.pl/index.php?Itemid=8&option=> instead <http://vba.m-des.pl/oferta/system-vbm/co-to-jest-vbm.html>

See that in my menu sometimes second level menu item is first item in third level.

I generated new pass for you (send by system).

Posted by metmusic - 2010/12/08 18:23

Now is fine.Thanks again. What now was a reason?
Updated version is available to download?

=====

Re:Menu Item using alias (or not) causes 404 error.

Posted by admin - 2010/12/08 18:24

No, we have just updated menu.html.php file on your server. We will include this update into the next version of the module.

Regards,
ARI Soft

Re:Menu Item using alias (or not) causes 404 error.

Posted by metmusic - 2010/12/15 09:55

Hi,

The problem is back :/. I made 4th menu level and 3hird with child looks the same as before. <http://vba.m-des.pl/index.php?Itemid=8&option=> instead <http://vba.m-des.pl/oferta/biznes/system-vbm/co-to-jest-vbm.html>. In my menu parent with childs is ususualy "menulink". For example:

1st Level: Oferta - it's fine (article)
2nd Level: Biznes - it's fine (article)
3rd Level: System VBM - broken (alias to first item in 4th level)
4th Level: Co to jestVBM - it's fine (article)

Please take a look.

<http://vba.m-des.pl/administrator/>

Pass and login send by e-mail.

Thanks!

Posted by metmusic - 2010/12/15 13:07

There is still problem.
When I disable 4th level and 3rd is last one it's crashes :/
Please take a look.

Pass and login send by e-mail

Re:Menu Item using alias (or not) causes 404 error.

Posted by metmusic - 2010/12/15 13:57

Thanks! Almost ok... one thing - in backend in "Menu Glowne" there is no menu item "Kim jestesmy" but on frontend is present as a second item. Don't know how to disable or remove it. URL is also bad.

Posted by hutdji - 2011/02/09 08:01

Hi,

on my website with Joomla! 1.5.22 it's working fine with aliases (I've rated as excellent), but now on a another website with 1.6 it doesn't.

Regards,

Hen Ning
