Intermittment ability to select sub-menu items

Posted by JCP - 2010/09/09 13:35

Hi,

Just installed the ARI YUI module which is great, but I have intermittent problems selecting a sub-menu from the drop down with Firefox. I have deleted all entries in the CSS Styles under Module Paramters, but cannot resolve the problem.

Please see http://www.stmarys-berkeley.co.uk/

Thanks,
Jared

Hello,

This problem with site template styles. Use the next CSS rules:

```
#wrapper_r
{
  position: relative;

}
#tabarea_r
{
 height: 32px;
}

#tabarea
{
  position: relative;
  z-index: 1;
}
body #search
{
 position: relative;
 z-index: 0;
 margin-top: -10px;
 height: 45px;
}
```

Regards,
ARI Soft

Perfect!

Thanks
