
Center menu bar

Posted by g8rduc - 2010/09/20 14:10

Hello and good morning! Trying to center the top menu bar...site is www.ownersperspective.org

Thank you!

Hello,

Use the following CSS rules:

```
.art-BlockContent-body .yui-skin-sam
{
  text-align: center;
}
```

```
.art-BlockContent-body .yui-skin-sam .yuimenubar
{
  display: inline-block !important;
}
```

Regards,
ARI Soft

Thank you for the quick reply. When I insert the CSS, it moves the body of the page down and leaves a big blank...I have removed the CSS so that it looks correct.

Is there a certain spot I need to insert that code to? Thanks again.

When we insert this code with help FireBug plugin for FireFox browser it works fine. Does this problem occur in all browser or only in specific browser?

Any browser I look at it seems to happen. Which CSS file are you inserting it into? Seems that the insertion into ariyui64 CSS gives me the incorrect code....

This code can be added to 'CSS Styles' parameter in module settings. If it doesn't help, provide temporary access to your Joomla! backend by email that we can investigate this issue.
