Hi,

Great menu module! I am having a problem though developing my website with ARI YUI menu. Attached you can find a pic of the menu, the submenu is not fully visible. Any idea how I could fix this?

Keep on the good work guys!

Hello,

It seems this problem with "overflow: hidden" CSS property in site template. Provide link to page where we can see this issue, please, that we can investigate this issue in more details and provide solution.

Hello,

The site is still in design, it is not online yet! Can I send you my joomla folder? Or does it really have to be online?

Hello,

Open the page in a browser, choose 'Save as' menu item in browser's menu, choose 'Web page, Complete' option, archive saved files and send it to us by email.
