
Menu centering problem.

Posted by Gary - 2010/10/13 00:48

Hi,

I've tried reading through the forum and cannot get this to work for me.

I'm trying to center the menu and stretch the menu to fill out the navigation width.

I cannot seem to accomplish this without having the extra 30px or so to the right of the last navigation button.

www.re-solutionsinc.com

Any help would be appreciated.

Thanks.

Hello,

We can provide the following CSS rule only:

```
#ariyui71 .yuimenuubar ul
{
padding-left: 40px;
}
```

Regards,
ARI Soft
