
ari yui menu active item

Posted by clo2471 - 2010/11/07 14:55

Hi, in my web page, the yuri menu highlight the wrong home text menu. How do i change the highlight menu item. You can see the web page here <http://www.aqcca.org/aqcca>

As you can see the aqcca menu is highlight when it should be the "Accueil" item. Sorry for my english and thanks in advance.

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue? We suppose this problem with menu items configuration.

Regards,
ARI Soft

We have investigated this problem. The module works fine, this problem with modification which you have done in module styles and with site template styles. We have set "Highlight current item" parameter in module settings to "Yes" that it highlights current menu item and add custom CSS rules to "CSS Styles" parameter that fix problem with site template styles.

Regards,
ARI Soft
