
Slide out items behind other modules

Posted by girkers - 2010/11/10 12:33

The site I am currently developing, I am using the ARI YUI menu in a vertical orientation and the problem I am having is that the slide out menu is going behind other elements on the page. I have edited the CSS of the template trying to manipulate the z-index of the two columns but that has had no effect.

If I use a different template the submenu appears on top of the other elements, however this is not the case for the template I need.

The site is <http://abflab.server101.com>

I am also intereseted in how I remove the surrounding box around the menu. I tried the CSS here <http://www.ari-soft.com/ARI-YUI-Menu/4798-removing-border-from-menu.html> but that did not work for me.

Thanks

Girkers

Hello,

Add the following CSS rules:

```
.contentLayout DIV.sidebar1,
.contentLayout DIV.sidebar1 .Block,
.contentLayout DIV.sidebar1 .Block .BlockContent
{
    overflow: visible;
}
```

Regards,
ARI Soft

This is great, works beautifully.

No to just get rid of the surrounding box.

Use the next CSS rules:

```
body #ariyui17.yui-skin-sam .yuimenu .bd
{
    border-style: none;
}
```

```
body #ariyui17.yui-skin-sam .yuimenu .bd .bd
{
border-style: solid;
}
```

Regards,
ARI Soft
