## IE7 issue with horizontal menu

Posted by Jewels - 2010/11/13 00:39

---

Good evening!

site: [www.sportlink.ca](http://www.sportlink.ca)

I am using the YUI menu for a sport events menu but I have an issue in IE7. The sub menu items do not show up underneath the parent item when you mouseover the parent item "Select Event Type". It shows up in the middle of the screen!

The menu works fine when I use the vertical option in the parameters but I don't want vertical! I want it to simulate a quick jump menu without the hassle of a quick jump menu...

What css can fix this issue and where to I put the code (in the module parameters or the css file itself)?

Thanks!

Hello,

Add the following CSS rule:

```
.yuimenubar DIV
{
    margin: 0;
}
```

Regards,
