
How to Make ARI YUI Work on Slteground j15-84 Temp

Posted by deezay4u - 2010/11/16 03:49

To Whom It may Concern,

I am a novice in web development and have to create a drop-down menu on the top menu in the above mentioned template.

I dont know how to perform this? i saw lot of information on this place so looking forward for your reply...

Hello,

Could you explain what problem you have with your site template? If don't know how to use Joomla! menu modules, read about it [here](#).

Regards,
ARI Soft
