
menu level

Posted by clo2471 - 2010/11/16 15:09

Hi, is there a way to take out the link on the first level of a menu. I would like that when they pass the mouse over a menu, the first level dont bring them anywhere onltly the sub-menu. If you go : www.aqcca.org/aqcca and then you pass you mouse over AQCCA, there is a submenu, i would like that only the sub-menu is available so there is no clic on the AQCCA. Am I clear since english is not my mothertong. Thank a lot

Hello,

Do you want to do "L'aqcca" menu item is unclickable?

yes and so on for the other menu on top. The first menu level is only like a title, the rest (sub-menu) is where the information is.

Set menu item type for this menu items as "Separator" when edit or create menu item in Joomla! menu manager.
