
Menu style not showing correctly after upgrade

Posted by jmarian1 - 2010/11/18 00:22

Hi, the menu at <http://www.au1.org> is not showing the style correctly after the upgrade but all is intact in the code. I wonder if you know where I can modify it. Please advice. Thanks and hope to hear from you soon.

Hello,

Sorry, but this is not Joomla! site and doesn't contain "ARI YUI Menu".

Regards,
ARI Soft

What styles are shown incorrectly? Have you done some changes in menu styles before update? If you did it in default menu CSS file, your changes were lost. Type necessary changes in "CSS Styles" parameter in module settings or in site template CSS file.

Hi, I didn't change anything in the CSS style before the upgrade. In the menu itself, the background has an image and each menu is supposed to be in blue background color and when you hover each drop down menu supposed to be in orange color. Somehow, when I upgrade it to 1.0.17, the style of the menus are gone and return to normal which is the current one right now. Please advice and hope to hear from you soon again. Thanks.

Styles can go out only if modification were done in module CSS file. New version doesn't change default menu styles.

Hi, can you please give me the path where the CSS file can be modified? I can't find where I changed it. So much CSS file that I am not sure which one can be modified. Please advice and hope to hear from you soon. Thanks.

CSS file is located by the following path:

/modules/mod_ariyuimenu/mod_ariyuimenu/js/assets/menu/sam/menu.css

Hi, I did modify the CSS before the update however, after the update I can't find where i modify it. Attached is how it looks like before the upgrade. That is how I wanted it after the upgrade also. Please direct me to the right path where i can modify the background, center the text, change the block background color, etc. I want the menu to be like the attached one. Hope you can help me and hear from you as soon as possible. Thanks.

You can use the following CSS rules in "CSS Styles" parameter in module settings:

```
#nav .yui-skin-sam .yuimenuubar
{
/* Use path to background image instead of none attribute, for example url(/templates/auw_test/images/bkg-sidebar-menu-bottom.png) */
background: orange none;
text-align: center;
padding-top: 8px
}
```

```
#nav .yui-skin-sam .yuimenu UL
```

```
{  
  display: inline-block;  
  *zoom: 1;  
  *display: inline;  
}
```

```
#nav .yui-skin-sam .yuimenu UL LI.yuimenuitem
```

```
{  
  margin-left: 3px  
}
```

```
#nav .yui-skin-sam .yuimenuitemlabel
```

```
{  
  color: #FFF;  
}
```

```
.yuimenuitem
```

```
{  
  background: blue;  
}
```

```
#nav .yui-skin-sam UL LI.yuimenuitem-selected .yuimenuitemlabel,
```

```
#nav .yui-skin-sam UL LI .yuimenuitemlabel-active,
```

```
#nav .yui-skin-sam UL LI .yuimenuitemlabel:hover,
```

```
#nav .yui-skin-sam UL LI .yuimenuitemlabel:focus
```

```
{  
  color: blue;  
}
```
