How to create DROP DOWN menu?

Posted by redemption - 2010/11/27 11:00

_____

Hello!

I am really new at this, so I have to ask, how do I create a drop down menu, on my exisitng menu? The thing is, I have a menu called Gallery, and what I want to do is, that on drop down menu there is a list of the gallerys. I hope you understand. Right now, i work offline. How can you help me? Can I provide you my CSS or something? Becouse later on, I will create a menu on the same basis, but for all the races I will attend.

Thank you for your help!!

Or at least, tell me how to change the background color (now its white) to black, and the font color to red, like my existing menu has it?! http://www.ari-soft.com/images/fbfiles/images/galerija2_odprta_nov_meni.jpg

_____

Hello,

Create sub-menu items in Joomla! menu manager that it is shown in menu module.

Regards,
ARI Soft
